AMER YASSER AMER

Cybersecurity Specialist & Full-Spectrum Developer
Phone: +20 1552562959 | Email: mramer307@gmail.com
LinkedIn: Profile Available Upon Request | Location: Egypt

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Specialist with 2+ years of hands-on experience in vulnerability assessment, web application penetration testing, and network security analysis. Versatile background spanning Front-End Web Development, Mobile Application Interfaces, Embedded Systems (Arduino/ESP32), and Graphic/UI-UX Design. Proven track record of delivering end-to-end tech solutions, securing web platforms, and designing custom hardware-software integrations.

TECHNICAL SKILLS

- **Cybersecurity & Operations:** Penetration Testing, Web Application Security, Network Security Analysis, Vulnerability Assessment, Threat Analysis, CTF Challenges
- **Security Environments:** Kali Linux, BlackArch Linux, Nmap, GoBuster, JoomScan, Sublist3r, CloudFail, BeEF, Metasploit, Wireshark, Burp Suite
- **Programming & Scripting:** Python, C, C++, Java, Go, PHP, Dart, JavaScript, Shell Scripting (Bash)
- **Web & Mobile Development:** HTML5, CSS3, JavaScript, React.js, Bootstrap, Flutter, Responsive Design, REST APIs
- **Embedded Hardware & IoT:** Arduino (Uno/Mega), ESP32 Microcontrollers, Circuit Wiring, Sensor Integration (KY-039, Servos, Audio Modules), C++ Microcontroller Programming, OpenSCAD 3D Prototyping
- **Design & UI/UX:** Adobe Photoshop, Adobe Illustrator, Affinity Designer, Figma, Graphic Design, Branding, Prototyping

PROFESSIONAL EXPERIENCE

Cybersecurity & Software Development Specialist (Freelance / Independent)

October 2024 – Present

- Conducted comprehensive web application penetration testing and vulnerability scans using industry-standard security tools (Nmap, GoBuster, Burp Suite) to identify system risks and propose remediation strategies.

- Developed and deployed responsive front-end web applications using HTML5, CSS3, JavaScript, React.js, and Bootstrap, ensuring seamless user experiences and secure coding practices.
- Engineered mobile application interfaces using Flutter and Dart, focusing on optimized UI/UX design and performance.
- Programmed and assembled custom embedded hardware projects (Arduino/ESP32) involving sensors, microcontrollers, and custom 3D enclosure models using OpenSCAD.
- Authored custom automation scripts in Python and Shell to streamline security testing tasks and routine system operations.
- Created digital branding assets and UI/UX prototypes for client platforms using Figma, Adobe Illustrator, and Photoshop.

KEY PROJECTS

- **Web Application Penetration Testing & Vulnerability Assessment:** Performed end-to-end security audits for web platforms, identifying misconfigurations and potential exploit vectors; delivered actionable remediation reports to secure system endpoints.
- **Responsive Front-End Platforms & UI Prototyping:** Designed and developed fully functional web and mobile interfaces using React.js and Flutter, emphasizing clean architecture, accessibility, and modern UI/UX principles.
- **Custom Embedded Audio & Sensor Processing Unit:** Designed circuit logic, programmed microcontrollers in C++, and built 3D-printed custom enclosures (OpenSCAD) for dedicated audio playback hardware.
- **Security Scripting & Automation Tools:** Built Python and Bash utility scripts to automate network enumeration, directory brute-forcing, and security workflows.

CERTIFICATIONS & LEARNING LABS

- **TryHackMe / CTF Labs:** Active participant in offensive security, web security, and network analysis scenarios.
- **Cybersecurity & Network Security Practices:** Practical hands-on experience in ethical hacking tools and methodologies.
